TECHNICAL DATA SHEET

ICM 1005 100% glycidoxypropyltrimethoxysilane

Description	Property	Test Method	Value
 This additive is a silane that can readily react with a wide range of surfaces including organic polymers, glass, and ceramics. Key Features Effective coupling agent Increases tensile, compression and modulus strenght to composites Improves adhesion Effective at low concentrations and has great compatibility with organic polymers and inorganic fillers Key Applications Coupling agent Adhesing agent 	Product Appearance Color (APHA) Specific Gravity A Viscosity (cst)		Clear 5 1.07 3
	Storage Max Storage Temperature Shelf Life		40 °C / 104 °F 24 mths

- Adhesion promoter
- Cured resins
- Acrylic applications

Application

ICM 1005 is used in formulations as a coupling agent and adhesion promotor in a wide variety of applications.

Use and Cure Information

This product is generally added to compositions at less than 1% in most formulations. Our product can be applied to surfaces as a dilute aqueous solution. It can also be mixed with water using light agitation.

Health & Safety

Read product and safety data sheets before handling this product for physical and health hazard information. The safety data sheet is available from your CHT representative.
